

New ownership structure at BKP Berolina Polyester GmbH & Co. KG

- Greiffenberger AG sells their 75% share in BKP -

Velten, 11.10.2016 – In their publication from Monday 10.10.2016, Greiffenberger AG shared inside information in accordance with Article 17 MAR that their 75% in BKP Berolina Polyester GmbH & Co. KG (BKP) was being sold. The purchaser is a subsidiary company of T3 Holding GmbH. The completion of the purchase contract is still subject to closing conditions and is expected to take place by 30 October 2016 at the latest. Having now been the managing director for more than 25 years, Ralf Odenwald will also be supporting the company in the future as both the Managing Director and a 25% Shareholder.

The employees of BKP Berolina Polyester GmbH & Co. KG based in Velten (near Berlin) welcome the new shareholder and look forward to the successful future cooperation.

BKP Berolina Polyester GmbH & Co. KG is an internationally-operating system provider in the trenchless pipe rehabilitation. In addition to the Berolina-Liner system, a product that has been established for more than 15 years for sewer pipes, we also provide diverse products and solutions for the entire sector of mains and lateral conduit and pipe repair.

The DIBt-approved Berolina-Liner System is available from DN 150 mm [6"] to DN 1600 mm [63"]. We provide client-specific solutions for the simplified installation of the Berolina-Liner, such as the mobile conveyor belt. This installation aid facilitates the feeding in of large diameters or particularly long liners. We also provide small and large UV units for fast mobile use, robotics, and equipment for the repair of house connections, all optimised for the use of BKP products.

The GRP protection for steel pipes, a protection for trenchless laying of gas pipelines in sizes DN 150 to DN 1400 completes our product range.
