BKP AT RSM'S BI-ANNUAL OPEN DAY - Doncaster, 2017

BKP exhibiting at RSM's second bi-annual Open Day, Doncaster - 20th July, 2017

BKP were delighted to be invited by its U.K. distribution partner - RSM Lining Supplies, along with dozen companies, to exhibit and demonstrate the Berolina-Liner. The Berolina-Liner has been widely used in the U.K. for more than 10 years.

Apart from exhibiting and demonstrating the BKP system, RSM's open day provided an excellent opportunity to meet and talk directly with RSM clients who have been using the Berolina-Liner as their preferred pipe rehabilitation solution.

Despite a slightly damp start to the day (you can always rely on the English weather to deliver!), the clouds soon cleared away and many good conversations were had between Börje Person - BKP's

International Export Manager, and contractors and utilities managers attending the open day.

During the open day BKP were able to carry out a demonstration installation of the Berolina-Liner in a DN300 pipe.

RSM, a market leader in the U.K. for lining supplies and equipment, aims to offer choice of systems and solutions to contractors, utility managers and

engineers, carefully selected from a network of industry renowned manufacturers.

BKP looks forward to supporting RSM's next Open Day, and continuing to work with RSM in distributing exclusively the Berolina-Liner to the U.K. market.
